Rnd 14: In BLO, HDC in each ST around. (72) CH 1, turn.

Repeat Rnd 14 until the work reaches the desired height. Once this has been achieved, fasten off, leaving a long tail for stitching the open seam. Turn the bin inside out and Stitch the open seam using a whipstitch and matching the horizontal lines as you complete the seam. Weave in ends.

DOOR:

Rnd 1: CH 12, turn.

Rnd 2: HDC in second chain from the hook and in each remaining ST across. (11) CH 1, turn.

Rnd 3 - 6: HDC in each ST across. (11) CH 1, turn.

Fasten off, leaving a long tail for stitching. Stitch Door in place on the Grain bin body.

ASSEMBLY:

Trace the outline of the bottom circle of the grain bin body onto a piece of cardboard and cut out. Placing this piece inside the bottom of the grain bin will help it to sit flat on the bottom while on display.

Fit the cardboard piece into the base of the bin and stuff the grain bin body with fiberfill.

Now, using the long tail from the roof piece, begin stitching the roof to the body of the grain bin leaving a 2 inch opening to allow you to stuff the roof with fiberfill. After you have stuffed the roof firmly, complete the seam to close the opening. Weave in ends.

Now, use your Grain bin to decorate for the harvest season.

I learned to crochet from my Grandma Sherrie when I was 8 years old, Crocheting hot pads and wash rags, and learning new stitches was just a way to spend time with Grandma then. Something happened along the way as I kept crocheting into adulthood. I found the same love for crocheting that my Grandma had. My wish is that you will share your love of crocheting by patiently teaching a friend, coworker, neighbor, child, or loved one the basics of how to crochet so that just maybe, they might find the same spark that you and I, and Grandma Sherrie share.
